

DEPARTMENT OF COMPUTER SCIENCE & ENGINEERING

Discover. Learn. Empower.

Experiment-1

Student Name: Anshul Aery

Branch: CSE

Semester: 5th

Subject Name: ADBMS

UID: 23BCS12536

Section/Group: KRG-2A

Date of Performance: 28-07-25

Subject Code: 23CSP-333

1. Aim:

a.) Department-Course Subquery and Access Control

- Design normalized tables for departments and the courses they offer, maintaining a foreign key relationship.
- Insert five departments and at least ten courses across those departments.
- Use a subquery to count the number of courses under each department.
- Filter and retrieve only those departments that offer more than two courses.
- Grant SELECT-only access on the courses table to a specific user.

dept_id	dept_name
1	Computer Science
2	Mechanical Engineering
3	Electrical Engineering
4	Mathematics
5	Physics

course_id	Course_name	dept_id
101	DSA	1
102	Algorithms	1
103	Operating System	1
104	Fluid Mechanics	2
105	Thermodynamics	2

DEPARTMENT OF COMPUTER SCIENCE & ENGINEERING

Discover. Learn. Empower.

2. Objective:

- To understand how to use JOINS in SQL.
- To understand the basic SQL Queries.
- To learn how to use Sub-Queries in SQL.

3. DBMS Script:

-- Department table

```
CREATE TABLE Department (
```

```
    dept_id INT PRIMARY KEY,
```

```
    dept_name VARCHAR(100)
```

```
);
```

-- Course table with a foreign key to Department

```
CREATE TABLE Course (
```

```
    course_id INT PRIMARY KEY,
```

```
    course_name VARCHAR(100),
```

```
    dept_id INT,
```

```
    FOREIGN KEY (dept_id) REFERENCES Department(dept_id)
```

```
);
```

-- Insert into Department

```
INSERT INTO Department (dept_id, dept_name) VALUES
```

```
(1, 'Computer Science'),
```

```
(2, 'Mechanical Engineering'),
```

```
(3, 'Electrical Engineering'),
```

```
(4, 'Mathematics'),
```

```
(5, 'Physics');
```

-- Insert into Course

```
INSERT INTO Course (course_id, course_name, dept_id) VALUES
```

```
(101, 'Data Structures', 1),
```

```
(102, 'Algorithms', 1),
```

```
(103, 'Operating Systems', 1),
```

```
(104, 'Thermodynamics', 2),
```

```
(105, 'Fluid Mechanics', 2),
```

DEPARTMENT OF COMPUTER SCIENCE & ENGINEERING

Discover. Learn. Empower.

-- Departments with more than 2 courses

```
SELECT dept_name
FROM Department
WHERE dept_id IN (
    SELECT dept_id
    FROM Course
    GROUP BY dept_id
    HAVING COUNT(course_id) > 2
);
-- Grant SELECT access
GRANT SELECT ON Course TO readonly_user;
```

OUTPUT:

A screenshot of a SQL query result displayed in a dark-themed window. The window has a title bar and a content area. The content area shows a table with one column named 'dept_name' and one row with the value 'Computer Science'.

dept_name
Computer Science

4. Learning Outcomes:

- You will be able to write basic SQL queries.
- You will learn to perform JOINS in SQL.
- You will understand how to implement Sub-Queries.
